Additional File 3: Figure S3

Example showing predominant labelling of the plaque core using 029-2 (purple) in a sporadic AD patient while IC16 labels also more diffuse portions of amyloid plaques (green). As secondary antibodies, donkey-anti-mouse DyLight488 (green, Thermo Fisher Scientific) and goat-anti-guinea pig DyLight650 (purple, Thermo Fisher Scientific) were used. Scale bar: 33 µm
